

Etrofil was founded in 1998 at Yalova as a member of Acme Holding together with sister companies Armis Bedding, Artemis Carpets, Doğu Vehicle Inspection Stations and Arte Energy.

Our head Office is in İstanbul though primary production facility is in Yalova and a very large, elaborated dye house located in Gaziantep with 1500 tons of capacity per year. 750 tons of it is made of wool blended yarns.

Currently we are working with customers from 30 different country and serving our products mainly to Denmark, England and Germany.

Comparing to the last five year our growth rate is approximately 20% and we aim to grow each day without compromising from our quality and service policy.

For Etrofil carded yarns building an environmental protection consciousness is at most importance. With this understanding we are producing 100% Organic certificated and recycled yarns along with classical type of yarns which is why we have GOTs, 100% Organic, Oeko-tex certificates and also all of our wool based products are non mulesed certificated.

Our employees well being is essential. To make sure we are on the right track we are getting our inspected by a third party regularly and by which acquiring our BSCI certificate.

Therefore our secret of success lays in the fact of our experienced team of 200 people and their very hard work.
