Outdoor 40

Tough in wind & weather

Art. 798300
400 m - 24 shades

Thickness No. 40

Sales unit 5 Miniking spools

Material 100 % Polyester

Care 

Needle Universal needle

Needle size NM 90 - 110

Shade selection

Small shade variations may occur.

Discover Outdoor 40 from Gütermann creativ - the special sewing thread for outdoor textiles.

Whether on the balcony, in the garden or on the beach: Outdoor textiles are exposed to sun, rain, snow, dirt or wind and have to withstand a lot. They must be durable and easy to clean and dry as quickly as possible. Hard-wearing sewing threads are essential for withstanding these stresses. Conventional sewing threads are only suitable for use outdoors to a limited extent: They quickly become damaged and lose the necessary properties, in particular colour fastness. Outdoor 40 has been specially developed for these conditions.

Outdoor 40 impresses with its particularly high UV resistance and durability. It withstands extreme sunlight and impresses even after years with its colour fastness and strength, while remaining visually appealing.

In the maritime sector, sewing threads come into contact with salt water. Outdoor 40 is also specially equipped for these enormous demands. Thanks to its particularly high tear and abrasion resistance, it is ideal for sewing strong closing and backstitch seams on all kinds of outdoor fabrics, such as upholstery and awning fabrics and canvases.

Whether it's upholstery, cushion covers for chairs and couches, sun and wind protection, bags or outdoor accessories - there are no limits to your creative ideas thanks to the beautiful range of 24 colours and high colour fastness. In combination as bottom and top thread, Outdoor 40 can be sewn extremely well on household sewing machines.

With Outdoor 40, you can be sure that your seams will withstand extreme weather conditions.

Product advantages

- Particularly high UV resistance
- Resistance to seawater
- Particularly high colour fastness
- Lasting resistance to environmental conditions
- Extremely abrasion resistant
- Sewing with the sewing machine and by hand

Application

- Strong closing and backstitch seams
- Sewn as needle and bottom thread
- Outdoor textiles, e.g. cushion covers, pillows, blankets
- Sun and wind protection
- Bags/backpacks
